

Polarcus has a strong commitment to quality in every aspect of our business to deliver marine geophysical services and seismic data to our clients.

Polarcus aims to deliver high quality services and products that, as a minimum, shall meet all of our clients and other stakeholder's expectations through working safely, being environmentally aware and operating efficiently.

Polarcus strives to ensure that processes and methods necessary to satisfy our stakeholders' requirements and expectations, as well as our own business objectives, are implemented as part of the Company's Management System and practiced effectively across the Company.

Polarcus promotes an understanding of, and our commitment to, quality through the development and training of our personnel in an ever-changing business and technology related environment.

Polarcus recognizes employees for their contributions to the Company's Core Values of Responsibility, Innovation and Excellence.

Polarcus continually seeks improvement in the quality of our services in order to generate value and instil confidence in our clients.

On an annual basis, Polarcus develops and shares with the organization strategies and goals for the continual improvement of our quality management system and ultimately the business.

Polarcus systematically conduct audits and management reviews of ourselves and of our suppliers to ensure that our Management System delivers quality, remains current, and is always effective and efficient.

Duncan Eley, CEO
