

OUR COMMITMENT TO SECURITY

Polarcus carries out comprehensive risk assessments to identify, evaluate, and mitigate potential security risks in all aspects of the business, in order to ensure the safety of people and assets at all times.

Polarcus achieves this through compliance with the Polarcus Management System, all applicable laws, rules and regulations or administrative decisions of any government or regulatory body having jurisdiction over the areas of our operations. Polarcus maintains a commitment that no one is harmed working for or with us and no systems or data will be compromised.

Polarcus monitors and plans all activities entailing any security risk exposure through a process of risk management. Through the implementation of mitigation measures, the residual security risk at our worksites shall be reduced to As Low As Reasonably Practicable (ALARP).

Polarcus arranges services necessary for the protection of our operations, systems and data and identifies appropriate professional suppliers to provide security, when necessary, in any location in which we work.

All employees or suppliers engaged on Polarcus worksites are responsible for reporting to their immediate supervisor any actual or suspected security concerns.

A handwritten signature in black ink, appearing to read 'D Eley', with a long, sweeping underline that extends to the right.

Duncan Eley, CEO
